

Grandma Tannis's

7 Times Rhymes

for kids who can count
to 63

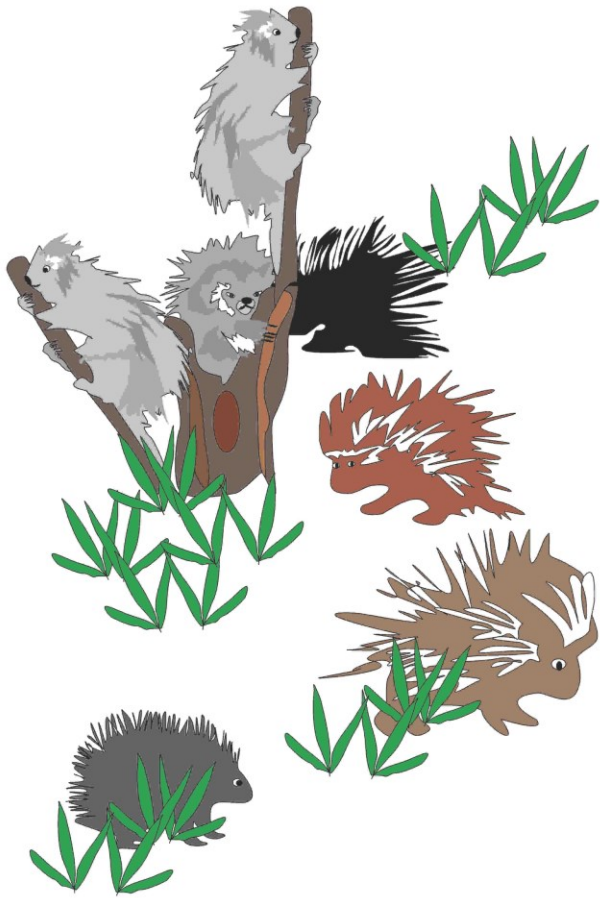

$$7 \times 1 = 7$$

$$7 \times 1 = 7$$

(C) Tannis Ewing 2014

7 times 9 is 63,
as 7 men each
pick 9
from a tree.

Grandma Tannis's

7 Times Rhymes

for kids who can count
to 63

Note to Parents:

For millennia, people have used an oral tradition to pass information between generations. Rhyme and rhythm have always benefitted the process of memorization. As you read the book, you can count with your child to establish the validity of each rhyme.

7 times 2 is a
cool 14
when 7 men each
keep
2 sardines.

7 times 8 is 56,
as 7 men each
play 8
drum licks.

7 times 7 is 49,
as 7 each
hunt
7 porcupines.

7 times 3 is 21,
if 7 men each
have 3
grandsons.

7 times 4 is 28
when 7 men
each have
4 playmates.

7 times 6 is 42,
as 7 each
drink 6
mountain brew.

7 times 5 is 35
when 7 men each
keep
5 beehives.
